

Project Initialization and Planning Phase

Date	28 June 2026
Team ID	
Project Name	Rising Water
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A disaster management officer monitoring flood-prone regions.	Predict the possibility of flooding in advance and take preventive action.	Weather conditions change rapidly, making floods difficult to predict accurately using traditional methods.	Existing forecasting methods may not provide timely and reliable predictions based on historical weather patterns.	Confident that early flood predictions will help protect lives, property, and resources
