Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS	THINKS
• “I want to know if a flood is likely in my area.” • “I need an early warning to keep my family safe.” • “Reliable flood predictions can help me prepare in advance.”	• “Will there be heavy rainfall this season?” • “I hope the prediction is accurate.” • “I should be prepared before the situation becomes dangerous.”

	PERSONA NAME Resident of a Flood-Prone Area (Citizen)	
DOES • Monitors weather forecasts regularly. • Checks flood alerts and local news. • Takes preventive measures when a flood warning is issued.		FEELS • Anxious during heavy rainfall. • Concerned about family and property safety. • Confident when receiving early flood predictions.
