Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	• Opens the Flood Prediction website. • Reads the instructions. • Enters weather details (temperature, rainfall, humidity, etc.).	• Clicks the Predict button. • Waits for the machine learning model to process the data. • Prediction is generated.	• Views the prediction result. • Understands whether there is a flood risk. • Clicks Predict Again if needed.
Touchpoint <i>What part of the service do they interact with?</i>	• Home Page • Input Form • Weather Data Fields	• Predict Button • Flask Backend • Machine Learning Model	• Result Page • Prediction Message • Predict Again Button
Customer Thought <i>What is the customer thinking?</i>	• Is this website easy to use? • What values should I enter? • Will the prediction be accurate?	• I hope the prediction is generated quickly. • Is the system working correctly? • Waiting for the result.	• What does the prediction mean? • Can I trust the result? • Should I check another location or data?

Customer Feeling <i>What is the customer feeling?</i>	Curious, Interested, Hopeful	Excited, Slightly Anxious	Relieved (No Flood) or Alert (Flood Risk), Satisfied
Process Ownership <i>Who is in the lead on this?</i>	Frontend (HTML, CSS, JavaScript)	Flask Backend + Machine Learning Model	Flask Backend + Frontend Result Page
Opportunities <i>How can we improve this stage?</i>	• Add tooltips for input fields. • Improve UI design. • Add input validation.	• Reduce prediction time. • Improve model accuracy. • Show loading animation.	• Display flood safety precautions. • Show probability/confidence score. • Add location-based weather integration.
